S-1300 Searchlight™ LED Flashlight

Law enforcement, firefighters and first responders require the best in flashlight technology to improve their personal safety and to help them perform their duties most effectively. The better you see, the more information you gather, the more information you gather, the better decisions you make regarding your own and the public's safety. For these reasons you need the brightest, longest lasting flashlight available, and you need it in a package that meets the demands of your job and doesn't hamper your ability to perform.

Think of the other safety tools you use: a vest, a Taser, a pistol, etc..., all of these are designed to be as useful and functional as possible in a package that works the way you need to work without compromising your capabilities. The *S-1300 Searchlight™* was designed to meet these same criteria.

The S-1300 is one of the brightest compact LED flashlights available anywhere in the world at any price. This 1300 Lumen flashlight is in a class of its own. It has a 5 setting push button tactical tail cap switch for: High, Medium, Low, Strobe and SOS for easy single-handed use. The *S-1300 Searchlight™* has an IP-65 rating for all weather use and comes standard with rechargeable batteries, an A/C battery re-charger and its own cordura holster.

The S-1300 flashlight is small & light enough for camping, hiking, backpacking or hunting; rugged enough for industrial use, built with an aircraft grade aluminum body and finished with a type III anodized coating. Despite its small size it is still bright enough for use as a rescue beacon or search tool for first responders, law enforcement and fire departments.
