Triangle Safety/Warning Light

The Biggest, the Brightest and the one Safety & Warning light you absolutely need!

If you travel or work the roads you need this safety light. This warning light is large and bright enough to be seen from over 1/2 mile away at night and reflective enough during the day to be seen from over a 1/4 mile away. This light & reflector can give people enough warning time to move over and stay clear to ensure your and their safety. This safety light has 69 bright LED's and 17 inch sides and stands over 16 inches tall on it's sturdy heavy duty base. It runs on 4 standard D cell batteries (not included) and can stay illuminated for approximately 40 hours of continuous use. This product also comes with a convenient container for storage.

Day Time

Night Time

This is the perfect warning light for any type of traffic control, accident or obstacle warning. Whether you're working a local neighborhood or interstate freeway make sure you help protect the people involved and help the people driving by to avoid any damage. These warning lights are easy to set-up and move. The warning lights have a dual mode switch for constant on or flashing mode, they collapse down to a small package and include their own plastic storage box for safe keeping in a trunk, truck storage box, under a car seat or anywhere else you need to store them.
